

TEXT TO SPEECH SERVICE

TEAM ID : PNT2022TMID27169

PROJECT NAME: PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF RELIANT

- To create the "Text to speech" service navigate to the catalogue and search for "Text to speech" and click on it.
- You will be navigated to another page where you can click on create to create the service

The screenshot displays the IBM Cloud Text to Speech service page. The top section shows the service details, including the location (London (eu-gb)) and the pricing plan (Lite). The Lite plan is selected, showing a price of Free. The Standard and Premium plans are also listed with their respective features and prices.

Plan	Features	Pricing
Lite	10,000 Characters per Month	Free
Standard	Standard Characters	\$0.02 USD/THOUSAND CHAR
Premium	Everything in Standard plus... Usage and Training Data is Private + Stored in an Isolated Single Tenant Environment High Availability and Service Level Uptime Guarantee IBM Cloud Service Endpoints HIPAA - Washington DC Only Custom Voice (Beta)	\$5,000.00 USD/INSTANCE \$0.02 USD/THOUSAND CHAR

The right sidebar shows the Summary section with the service name (Text to Speech-0s) and resource group (Default). Below this, there is a warning message about the existing Lite plan instance and a checkbox for the license agreement.

The bottom section of the page shows the 'Getting started with Text to Speech' tutorial, which includes a video player and a description of the service capabilities.
